Modelling the effects of domestication in Wheat through novel computer vision techniques

Author:	Mr. Nathan Hughes (nah26@aber.ac.uk)
Supervisor:	Dr. Wayne Aubrey (waa2@aber.ac.uk)
Degree Scheme	G401 (Computer Science)

Date:	April 24, 2018
Revision:	0.1
Status:	Draft

This report was submitted as partial fulfilment
of a BSc degree in Computer Science (G401)

Declaration of originality

I confirm that:

- This submission is my own work, except where clearly indicated.
- I understand that there are severe penalties for Unacceptable Academic Practice, which can lead to loss of marks or even the withholding of a degree.
- I have read the regulations on Unacceptable Academic Practice from the University's Academic Quality and Records Office (AQRO) and the relevant sections of the current Student Handbook of the Department of Computer Science.
- In submitting this work I understand and agree to abide by the University's regulations governing these issues.

Acknowledgements and Thanks

This work is a product of all the things Aberystwyth University has taught me, unfortunately there is not enough space here for everyone who should be thanked and acknowledged.

However, in relation to this project it would be a great crime to not thank my project supervisor Dr. Wayne Aubrey for his help and guidance; Professor. John Doonan, who provided the project and trusted me with it; Dr. Candida Nibau who taught me practically everything I know about biology.

My headphones, my books and all the art that kept me sane. Without J.K. Rowling, Arthur Conan-Doyle, Ben Howard and Bob Dylan my inspiration would have dried up long ago.

Finally, and most importantly, my mother Barbara Hughes. Who believed in me, always.
